LIST OF CONTENTS

Number 1–2

XI International Symposium on the Pharmacology of Thermoregulation—Part II

Acute Phase Response and Fever

M. Balaskó, M. Székely and **Z. Szelényi** 1 The effect of CP-96,345, a non-peptide substance-P antagonist, on thermoregulation and the development of endotoxin-fever in rats

Khalid Benamar, Antonio Fernández-Alonso, Eva Tavares, Francisco J. López-Valpuesta, Manuel Sancibrián, Michael J. Dascombe and **Francisco J. Miñano** 5 Fever induced by macrophage inflammatory protein-1β in the rat is independent of hypothalamic interleukin-1β or interleukin-6

M. J. Dascombe, T. T. T. Huynh and **R. H. Owen** 11 Behavioural thermoregulatory responses to malaria infection and interleukin-1β in rats

V. Fraifeld, L. Paul and **J. Kaplanski** 17 The relationship between hypothalamic prostaglandin E_2 or leukotrienes and the body temperature response to lipopolysaccharide in different murine strains

A. V. Gourine, L. R. Leon, K. Rudolph, J. Tesfaigzi and **M. J. Kluger** 21 Cytokine cascade induced by endotoxin in TNF double receptor knockout mice: evidence supporting a role for IL-10 in mediating antipyretic action of TNF

T. Hori, T. Katafuchi, K. Ota, T. Matsuda, T. Oka and **K. Oka** 29 Evidence for the involvement of AV3V in the circulating IL-1β-to-brain communication

J. Kaplanski, A. Magazanik, I. Hadas, U. Sod-Moriah and **V. Fraifeld** 35 Effects of lipopolysaccharide on body temperature and plasma zinc and iron concentrations in rats exposed to different ambient temperatures

S. V. Koulchitsky 39 Does selective destruction of the vagal afferent inflow facilitate or reduce the development of fever?

Wieslaw Kozak, Kimberly P. Mayfield, Anna Kozak and **Matthew J. Kluger** 45 Proadifen (SKF-525A), an inhibitor of cytochrome P-450, augments LPS-induced fever and exacerbates prostaglandin-E_2 levels in the rat

S. Li, E. Sehic, A. L. Ungar and **C. M. Blatteis** 51 Complement does not mediate the febrile responses of guinea pigs to muramyl dipeptide and polyriboinosinic–polyribocytidylic acid

M. T. Matuszek 59 The antipyretic effect of N^G-nitro-L-arginine methyl ester is related to its influence on metabolism

A. A. Romanovsky, A. I. Ivanov, H.-R. Berthoud and **V. A. Kulchitsky** 65 Are vagal efferents involved in the fever response to intraperitoneal lipopolysaccharide?

B. Störr, J. Roth, K. Voigt and **E. Zeisberger** 71 Local inhibition of LPS-induced hypothalamic TNF-formation by pentoxifylline has no effect on production of IL-6 within the anterior hypothalamus

L. Xin, E. B. Geller, M. Bastepe, R. B. Raffa, G-F. Mao, B. Ashby and M. W. Adler 77 Suppression of fever and hyperalgesic responses to the EP_3-receptor agonist GR 63799X by EP_3-receptor antisense in rats

Influence of Age and Other Conditioning on Thermoregulation and Fever

Matthew J. Campen, Joel Norwood, John L. McKee, Rudolph Mebane, Gary E. Hatch and William P. Watkinson 81 Ozone-induced hypothermia and bradycardia in rats and guinea pigs in nose-only or whole-body inhalation systems

C. J. Gordon and P. J. Rowsey 91 Role of vagal afferents in the mediation of chlorpyrifos-induced fever in the rat

M. J. Katovich and N. E. Rowland 99 Effect of perinatal NaCl exposure on the angiotensin-induced temperature response in adult SD rats

Z. Sun and R. Cade 105 Cold-induced hypertension and diuresis

M. I. Talan and N. I. Roukoyatkina 111 Sustained shivering is necessary for development of cold-induced hypertension in rats

B. Tzschentke and D. Basta 119 Development of hypothalamic neuronal thermosensitivity in birds during the perinatal period

M. L. Vargas, F. Tejada, A. Peñuela, R. Peñafiel and A. Cremades 125 Effect of potassium deficiency on body temperature in mice

W. P. Watkinson, M. J. Campen, K. L. Dreher, W-Y. Su, U. P. Kodavanti, J. W. Highfill and D. L. Costa 131 Thermoregulatory effects following exposure to particulate matter in healthy and cardiopulmonary-compromised rats

Clinical Concepts and Advances in Thermoregulation

T. Andres, M. Hexamer and J. Werner 139 Heat acclimation of humans: hot environment versus physical exercise

Matthias Bock, Philipp Kunz, Eike Martin and Johann Motsch 143 Intravenous or caudal clonidine does not influence core temperature in children

Christian F. Bulcao, Steven M. Frank, Srinivasa N. Raja, Kha M. Tran and David S. Goldstein 147 Relative contribution of core and skin temperatures to thermal comfort in humans

Steven M. Frank, Kha M. Tran, Lee A. Fleisher and Hossam K. El-Rahmany 151 Clinical importance of body temperature in the surgical patient

Richard R. Gonzalez and Margaret A. Kolka 157 Prediction of anticholinergic drug response using a thermoregulatory exchange index

N. Gupta, S. M. Frank, N. Ghoneim, H. K. El-Rahmany, M. A. Talamini, H. A. Zacur and S. N. Raja 165 Thermoregulation and hormone replacement in postmenopausal women

P. Huttunen, N. G. Lando, V. A. Meshtsheryakov and V. A. Lyutov 171 Effects of long-distance swimming in cold water on temperature, blood pressure and stress hormones in winter swimmers

M. Kosaka, M. Shimazu, J-B. Lee, M. Yamauchi, E. Kaneda and N. Ohwatari 175 Analysis of sweating induced by VIP iontophoresis in human skin

M. Sandsund, M. Sue-Chu, R. E. Reinertsen, J. Helgerud, B. Holand and L. Bjermer 181 Treatment with inhaled β_2-agonists or oral leukotriene antagonist do not enhance physical performance in nonasthmatic highly trained athletes exposed to $-15^{\circ}C$

M. H. Stirling and **K. C. Parsons** 187 A model of human water balance

K. M. Tran, S. M. Frank, H. K. El-Rahmany, N. S. Ghoneim, L. J. Kim and **R. A. Barnes** 191 Thermal and hemodynamic responses to postoperative rewarming with a sub-atmospheric pressure device

Number 3

Wei-Guo Du, Shui-Juan Yan and **Xiang Ji** 197 Selected body temperature, thermal tolerance and thermal dependence of food assimilation and locomotor performance in adult blue-tailed skinks, *Eumeces elegans*

A. V. Kolesnichenko, V. V. Zykova and **V. K. Voinikov** 203 A comparison of the immunochemical affinity of cytoplasmic, mitochondrial and nuclear proteins of winter rye (*Secale cereale* L.) to a 310 kD stress protein in control plants and during exposure to cold stress

Christopher J. Gordon, Peggy Becker, Paul Killough and **Beth Padnos** 211 Behavioral determination of the preferred foot pad temperature of the mouse

R. Bruce Bury, Alan V. Nebeker and **Michael J. Adams** 221 Response of hatchling and yearling turtles to thermal gradients: comparison of *Chelydra serpentina* and *Trachemys scripta*

D. Fortin, J. Larochelle and **G. Gauthier** 227 The effect of wind, radiation and body orientation on the thermal environment of Greater Snow goose goslings

P. Murzenok, B. Lange, B. Tzschentke and **M. Nichelmann** 239 Effects of recombinant interleukin 1b on oxygen consumption in the Muscovy duck embryo (*Cairina moschata*)

A. V. Kolesnichenko, V. V. Zykova, O. I. Grabelnych, O. N. Sumina, T. P. Pobezhimova and **V. K. Voinikov** 245 Screening of mitochondrial proteins in winter rye, winter wheat, elymus and maize with an immunochemical affinity to the stress protein 310 kD and their intramitochondrial localization in winter wheat

Francisco Bozinovic, Jorge A. Lagos, Rodrigo A. Vásquez and **G. J. Kenagy** 251 Time and energy use under thermoregulatory constraints in a diurnal rodent

Fernando Díaz, Miguel A. del Río-Portilla, Elizabeth Sierra, Marisela Aguilar and **A. Denisse Re-Araujo** 257 Preferred temperature and critical thermal maxima of red abalone *Haliotis rufescens*

I Information for contributors

Number 4

Michael J. Buono 263 Limb vs trunk sweat gland recruitment patterns during exercise in humans

J. S. Kari and **Raymond B. Huey** 267 Size and seasonal temperature in free-ranging *Drosophila subobscura*

Henry Gautier 273 Body temperature regulation in the rat

A. Buatois, P. Mimouni, J.-L. Chassé and **P. Clément** 281 Effects of constant or variable thermal rearing condition: a behavioural approach using an automated tracking system in *Blaberus craniifer*

Geoffrey F. Birchard 287 An ontogenetic shift in the response of heart rates to temperature in the developing snapping turtle (*Chelydra serpentina*)

Michael P. O'Connor, Linda C. Zimmerman, Edward M. Dzialowski and **James R. Spotila** 293 Thick-walled physical models improve estimates of operative temperatures for moderate to large-sized reptiles

G. P. Raaphorst, D. P. Yang and **C. E. Ng** 305 Comparison of survival and DNA double strand breaks for mild hyperthermia and low dose rate/pulsed low dose rate irradiation in human cells

S. Aizawa and **M. Cabanac** 313 Temperature gradient across the skin's layers has no influence on local skin vasomotor responses

Technical note

George S. Bakken, Kevin P. Kenow, Carl E. Korschgen and **Andrew F. Boysen** 317 Statistical and procedural issues in the use of heated taxidermic mounts

Number 5

V. V. Zykova, O. I. Grabelnych, A. I. Antipina, N. A. Koroleva, S. V. Vladimirova, A. V. Kolesnichenko, T. P. Pobezhimova and **V. K. Voinikov** 323 Plant stress-related uncoupling protein CSP 310 caused lipid peroxidation in winter wheat mitochondria under chilling stress

Michael P. O'Connor 329 Extracting operative temperatures from temperatures of physical models with thermal inertia

Dev Karan and **Jean R. David** 345 Cold tolerance in *Drosophila*: adaptive variations revealed by the analysis of starvation survival reaction norms

Michael E. Salvucci 353 Sorbitol accumulation in whiteflies: evidence for a role in protecting proteins during heat stress

Michael E. Salvucci, Dawn S. Stecher and **Thomas J. Henneberry** 363 Heat shock proteins in whiteflies, an insect that accumulates sorbitol in response to heat stress

Monica Jones Costa, Luciano Rivaroli, Francisco Tadeu Rantin and **Ana Lúcia Kalinin** 373 Cardiac tissue function of the teleost fish *Oreochromis niloticus* under different thermal conditions

Candace B. Matthew, David A. DuBose, Ingrid V. Sils and **Kimberly A. Tartartini** 381 Hyperthermia-induced changes in the vascular permeability of rats: a model system to examine therapeutic interventions

D. A. DuBose, C. B. Matthew, J. A. Balcius, D. H. Morehouse and **I. V. Sils** 387 Hyperthermic effects on reticuloendothelial system particulate uptake

J. S. Rhodes, P. Koteja, J. G. Swallow, P. A. Carter and **T. Garland Jr** 391 Body temperatures of house mice artificially selected for high voluntary wheel-running behavior: repeatability and effect of genetic selection

T. V. Kozyreva and **L. S. Eliseeva** 401 Immune response in cold exposures of different types

Number 6

Kari Y. H. Lagerspetz 405 Thermal avoidance and preference in *Daphnia magna*

C. Salin, D. Renault, G. Vannier and **P. Vernon** 411 A sexually dimorphic response in supercooling temperature, enhanced by starvation, in the lesser mealworm *Alphitobius diaperinus* (Coleoptera: Tenebrionidae)

E. Don Stevens, John W. Kanwisher and **F. G. Carey** 419 Muscle temperature in free-swimming giant Atlantic bluefin tuna (*Thunnus thynnus* L.)

A. Cortés, E. Miranda, M. Rosenmann and **J. R. Rau** 425 Thermal biology of the fossorial rodent *Ctenomys fulvus* from the Atacama desert, northern Chile

Michael Voss, Klaus Kottowski and **Wolf Wünnenberg** 431 Reactions of central neurons to peripheral thermal stimuli in the snail *Helix pomatia* L.

M. Šimečková, L. Janský, I. Lesná, S. Vybíral and **P. Šrámek** 437 Role of beta adrenoceptors in metabolic and cardiovascular responses of cold exposed humans

Erwin Lansing, Just Justesen and **Volker Loeschcke** 443 Variation in the expression of Hsp70, the major heat-shock protein, and thermotolerance in larval and adult selection lines of *Drosophila melanogaster*

V. Thiyagarajan, Y. V. Nancharaiah, V. P. Venugopalan, K. V. K. Nair and **T. Subramoniam** 451 Relative tolerance of cirripede larval stages to acute thermal shock: A laboratory study

Kyösti Marjoniemi 459 The effect of short-term fasting on shivering thermogenesis in Japanese quail chicks (*Coturnix coturnix japonica*): indications for a significant role of diet-induced/growth related thermogenesis

K. P. Ivanov 467 Physiological blocking of the mechanisms of cold death: theoretical and experimental considerations

M. M. Frankenberg, S. A. Jackson and **J. S. Clegg** 481 The heat shock response of adult *Artemia franciscana*
